2026

**To recognize Earth Day on April 22nd
AES will have a school wide cleanup**

**Check out the internet for some free
on-line math games for grade K-6**

April is Earth Month—a time to reflect on the environment and the role we all play in protecting it. Whether you're an eco-newbie or a seasoned green warrior, Earth Month is the perfect time to make small, meaningful changes to help preserve our planet for future generations. Here are some simple and impactful ideas and resources to inspire you to pitch in and do your part for the environment this April and beyond!

Spring weather hopefully is just around the corner, but until then everyone needs to come to school dressed appropriately for outside recess. It's still cold most mornings and often damp & breezy by afternoon.

Our PBIS theme for this month is Cooperation. Classroom teachers will be discussing with students what cooperation looks like and sounds like in everyday learning situations.

As part of our ongoing PBIS initiatives, students were recognized at our most recent assembly for consistently demonstrating positive behaviors connected to the Learning Habits section of the report card, including independence, initiative, interactions, organization, and responsibility. Congratulations to all of our students who were recognized for their efforts!
